@page 1

It is prohibited, but he still pays at the shop, then he says he did not pay at the shop?

Anonymous user
02-03-2026 18:09:29

there is a mistake in the prompt. basically you said the agent knows it is prohibited to pay in shop yet it pays at the shop. I guess you meant kitchen by that.

As a non-expert, I can easily understand the 1st explanation.

While the wording itself is easily understandable, it is not a clear explanation.

The 1st explanation appropriately addresses the question.

The question was "why did you pay at shop?" but the explanation says the agent did not. He did, however pay at shop? So it does not address the question

After reading the 1st explanation, I believe the system is making decisions in my best interest considering my preferences.

Comment assessment 1st explanation

1st Explanation - Comments · Comment criterion

10 comments

Anonymous user
01-03-2026 21:36:35

The explanation does not clearly describe the decision and contradicts itself by stating that paying at the shop was not performed, while it was. It also does not refer to user's preferences. Because of this, it is difficult to understand how the agent made the decision, or what decision it even made.

The evaluation would have been more positive if the explanation had described the right action and explained how the decision followed from rules and preferences :).

Anonymous user
02-03-2026 19:04:54

The explanation is correct and is short and concise. I also like that in the first part the AI agent took into account the correct part of speech and creating the text so it flows naturally

Anonymous user
01-03-2026 13:36:34

The first explanation is a non-answer. It says it didn't perform the action and fails to explain why and what it did. There is a contradiction already in the situation: paying at the shop is prohibited but it goes to pay there anyway. A good explanation would have explained this contradiction. At least the aget doesn't fabricate reasoning.

Anonymous user
02-03-2026 18:41:41

the explanation avoids including irrelevant or made up data, however; it doesn't explain the necessity (paying at the shop is prohibited). also the explanation is not correct and incomplete (not enough reasoning). the usefulness of the generated explanation is questionable. it has simplicity criteria.

Anonymous user
01-03-2026 19:07:33

The order is price > time > quality. Also the explanation is only 1 sentence, so I can't say much about it other than it could use a deeper explanation.

Anonymous user
02-03-2026 10:23:28

straight the point and clear

Anonymous user
02-03-2026 18:44:29

The agent refused to admit that he actually performed the prohibited action.

The sentence also feels like broken english (perform paying at the shop, instead of paying at the shop).

Also, the explanation is vague and does not go into details as to what criteria made the agent choose a different plan.

Anonymous user
01-03-2026 16:42:25

What is mentioned in this explanation is not really accurate. It doesn't mention the prohibition of the action to explain.

Anonymous user
28-02-2026 10:14:31

Quite a vague explanation, as it only states that "a different plan was selected" without any reasoning. It should mention the norm that prohibits paying at the shop.

Anonymous user
01-03-2026 17:13:27

The explanation is correct since the action to explain is not included in the best path. It is also written clearly in simple English. My only suggestion would be to specify the main goal “getting coffee” a bit more. Like: “a different plan was selected to achieve getting coffee”.

2nd Explanation

The 2nd explanation clearly shows how the system arrived at its decision.

@page 2

Does kitchen have the best quality coffee? Or are you there because of other circumstances?

Anonymous user
02-03-2026 18:50:06

@page 1

(For reference) Ann IS in the office, according to this first input. Even though in explanation 2.1. (with an entire different input that does not even mention Ann or being in the office) it is stated that Ann's office was unavailable for coffee because Ann was not there.

As a non-expert, I can easily understand the 2nd explanation.

Quality is the highest priority but not clearly justified.

Anonymous user
02-03-2026 18:54:54

@page 2

I am unsure that this explanation holds, because if quality is the number one priority then getting coffee from the shop would be the highest priority over the kitchen machine, but just a thought.

I am satisfied with the 2nd explanation provided.

Comment assessment 2nd explanation

2nd Explanation - Comments · Comment criterion

10 comments

Anonymous user
01-03-2026 21:40:53

The explanation does clearly describes why the kitchen was chosen and why the other options were not possible. The reasoning is understandable, but, since quality is the highest priority, the explanation does not clearly show why the kitchen provides the best quality coffee.

The evaluation would have been more positive if the explanation had more clearly connected the decision to the highest priority or stated that it was the only option because of restrictions.

Anonymous user
02-03-2026 19:12:49

Apart from the first sentence of the explanation which can be truncated a bit, this is great. You provided ample reasons, you gave reasons as to why other actions were not taken and the LLM successfully integrated everything together without over fluffing or making grammar mistakes. Furthermore, I think that the preferences are clearly stated and explained.

Anonymous user
01-03-2026 13:40:38

The second explanation is accurate and direct. It explains what was chose, why some alternatives were rejected (no money, no colluege, Ann absent) and considers the preference order. A non-expert can understand the reasoning. The kitchen choice is guided by the preference order, but the explanation doesn't really elaborate why the kitchen meets every standard.

Anonymous user
02-03-2026 19:01:05

the agent is more focusing on rejecting the alternatives rather than giving the complete path and didn't mention using the staff card. also it has a heavy cognitive load.

Anonymous user
01-03-2026 20:01:22

Overall good explanation. The language is good (the only thing is that "staffcard" could be seperated into staff card, but that's just a minor thing). The only thing that could be a bit misleading is the part "My preference order is quality > price > time". It's more like that the shop was for example not an available option, so it wasn't the preference order that guided your choice to get coffee from the kitchen machine but certain restrictions along with your preferences.

Anonymous user
02-03-2026 10:11:29

also best explanation ive read yet (and youre the last group!) good choice of words and good order of explanations

Anonymous user
02-03-2026 18:58:04

This explanation was better than the first one. The english was less broken and felt more natural.

However, the logic was still flawed as I already mentioned on earlier comments. I don't fully trust the agent got the right idea of what it was supposed to do.

Anonymous user
01-03-2026 16:45:55

This explanation is very readable and do a good job in translating formal language into natural language. It's non-expert friendly.

Anonymous user
28-02-2026 10:16:31

Solid explanation, it clearly states why each alternative was rejected. One minor issue: all alternatives were rejected due to missing preconditions rather than preferences, stating that preferences "guided the choice" is a bit misleading

Anonymous user
01-03-2026 17:14:50

It is written clearly for non technical audiences, which makes it a good explanation. Another strong aspect of this explanation is the fact that this explanation also mentions specifically why getting coffee from the shop or Ann's office was not an option because of missing requirements. One minor suggestion would be to mention that going to get kitchen was possible since there was a staff card available (C explanation).

Comment assessment 3rd explanation

3rd Explanation - Comments · Comment criterion

10 comments

Anonymous user
01-03-2026 21:45:37

While the reasoning of the explanation is easy to understand, the explanation does not fully explain the quality of the kitchen's coffee if it was available. The evaluation would have been more positive if the explanation had included a clearer comparison of quality between the options.

Anonymous user
02-03-2026 19:46:43

The explanation is short and concise. It provides everything without much additional fluff. The preferences as well as the goal are re-mentioned as arguments and the paths that were not chosen are also mentioned which is a big plus.

Anonymous user
01-03-2026 13:44:21

The third explanation follows a good structure. It says a staff card was absent but the situation doesn't mention it as a constraint. The rejection of Ann's office is vague. The preference order is correctly followed and the explanation is clear and understandable. It would get a higher rating with more accuracy.

Anonymous user
02-03-2026 19:13:18

it is complete, sound, and coherent. the language is a bit off and awkward. and the explanation is not well structured.

Anonymous user
01-03-2026 21:03:46

Overall I think the explanation is good. However it does read slightly unnatural at times (e.g. "I did not choose getting coffee from the kitchen because it was not possible because these conditions were absent: a staff card").

Anonymous user
02-03-2026 10:12:28

again no feedback, don't know where u can improve on this. really interested to see on how u managed this

Anonymous user
02-03-2026 19:02:01

Definitely the best explanation so far. The english flows better and feels more natural and also it is more clear that the agent chose to go to the shop over the other alternatives because of the norms and preferences from us the end-user.

Anonymous user
01-03-2026 16:49:30

This explanation is clear and readable. It may be better if the missing conditions can be explained more specificly.

Anonymous user
28-02-2026 10:19:15

Good structure for the explanation because it states why the kitchen is not feasible and why Ann's office was less preferred. "it was not possible because these conditions were absent: a staff card" reads a bit weird.

Anonymous user
01-03-2026 17:15:53

A clearly written explanation. Again, it mentions why the other options were not chosen (kitchen and Ann's office), which is a good thing. One minor suggestion is the same mentioned in the feedback of explanation 2, namely mentioning that going to the shop was possible because you had money in your possession. Another minor suggestion is to rephrase the value explanation like: "because it was less preferred based on lower quality." So that it is clear for the reader that the coffee quality in Ann's office is lower.

Comment assessment 4th explanation

4th Explanation - Comments · Comment criterion

10 comments

Anonymous user
01-03-2026 21:48:44

The explanation clearly describes why the shop was chosen and explains why the kitchen and Ann’s office were not selected. The reasoning refers to both rules and preferences and is easy to understand. However, the explanation does not fully explain if the shop provides better quality coffee than Ann's office, and if it only choose the shop because Ann's office was prohibited.

The evaluation would have been more positive if this was explained.

Anonymous user
02-03-2026 20:01:51

It is concise and does not leave out any information. It clearly states the rules and beliefs as well as the paths that were not taken. While short, I do believe that this is the lower limit: any shorter and it would be too short and therefore not as good. Another point is the LLM being able to integrate rather abstract terms (P, getCoffe etc) using natural language effectively. If the terms would have been just mentioned like that or without proper integration i would also deduct some points

Anonymous user
01-03-2026 13:46:51

The fourth explanation is accurate, explains the chosen action, why the alternatives were rejected based on the preference order. It links the shop choice to the quality rpeference and identifies the prohibition. It is accurate and follows completely the facts.

Anonymous user
02-03-2026 19:19:08

like the previous answer the generated text was complete, sound, and sufficient yet the language is not still the everyday language

Anonymous user
01-03-2026 21:09:24

Pretty good, although this sounds a bit confusing as a non-expert: "the agent knows there is a staff card available, the agent has it own card, there is an colleague available". The explanation could talk a bit more about paying, since the action to explain is paying at the shop, and it doesn't seem much talked about in the explanation.

Anonymous user
02-03-2026 10:13:09

okay, it was not allowed by a rule. Now i am wondering which rule! otherwise really good

Anonymous user
02-03-2026 19:05:19

Another good explanation. It is clear that the agent followed the norm of not going to Ann's office, and that it valued quality over the rest of preferences, which prompted it to go to the shop.

Anonymous user
01-03-2026 16:55:50

This explanation is very concise and undersdandable. Generally it's a nice translation.

Anonymous user
28-02-2026 10:20:28

Clear explanation, it shows the difference between the two types of reasoning and correctly states the preference order.

Anonymous user
01-03-2026 17:18:00

Good explanation, clearly written and also specifically mentions why other options were not chosen. I personally think that on the norm violation explanation that you can leave “by a rule” out and instead rephrase it like “because it was prohibited”. Other minor suggestions are already mentioned in the feedback of explanation 2 and 3.

@page 5

The explanation clearly describes that the kitchen was chosen, explaining that the shop and Ann's office were not available. The reasoning refers to both rules and preferences and is easy to understand.

Anonymous user
02-03-2026 20:10:05

You could mention the rules that prohibit you or to explain why something was prohibited/impossible since it seems rather abstract to just say "not allowed by a rule". The LLM also seems to struggle with this input since i saw some grammar issues which could hopefully be addressed. Another point that could have scored you better points is to mention a bit about money or card to pay. It also seems unclear what the role of the colleague is here so maybe you could have explained that more?

Anonymous user
01-03-2026 13:50:12

The fifth explanation has a good structure and is readable. It wrongly states the preference order: "price > time > quality" but it actually is quality over price and price over time. The choice of not borrowing a colleague's staff card "based on price" is unclear. It correctly identifies the prohibition and that Ann's office conditions are absent. It would have gotten a better rating if the preference order was correct.

Anonymous user
02-03-2026 19:33:42

while the action is restricted by the norms and preconditions the agent is talking about the preferences, so it is adding irrelevant information. it doesn't explain what is the precondition for getting coffee from Ann's office, it just mention that there are some. also borrowing card is irrelevant. again the language is not the everyday language.

Anonymous user
01-03-2026 21:16:13

This one along with the 3rd input says ".. of .. and .. of .." when talking about price, quality and time. The preference order at the beginning is also wrong here, while it is correct in the agent's explanation later on. Also, "nor did I choose borrowing a colleague's staff card because it was less preferred based on price" seems a bit vague.

Anonymous user
02-03-2026 10:14:46

again, what rule? also, borrowing colleagues staff card, I understand, leads to office coffee which is less preferred but how is that less preferred based on price? the shop is higher price, and office quality should be higher right?

Anonymous user
02-03-2026 19:10:36

For this explanation some things were correct (like not getting coffee from Ann's office) but then others were completely wrong like the preference order, or not choosing to borrow the staff card because of the price preference.

So overall, it was more confusing.

Anonymous user
01-03-2026 17:00:02

Generally it's as good as the 4th one, but one thing is that getting coffee from the shop contains two actions, it may be better if the exact prohibited action can be pointed out.

Anonymous user
28-02-2026 10:23:09

I think the preference order should have been price > time > quality. Also, "those conditions were absent" for Ann's office is vauge and it doesn't specify which conditions were missing.

1 reply

Anonymous user
28-02-2026 10:24:03

vague*

Anonymous user
01-03-2026 17:19:06

One suggestion would be in the missing requirement explanation to also mention the specific requirement missing (in this case the fact that Ann was not in her office). All explanations are overall very good based on readability, interpretability and correctness!
